

A partnership with the Center enables you to support churches by offering –

Congregation access to Learning Modules

- Learning Modules are discrete sets of resources that support a wide and expanding range of missional renewal objectives in the congregation. Learning modules include downloadable resources that provide for detail facilitation, video tutorials and distance coaching support.
- Examples include “Joining God in the Neighborhood” (engaging the wider community), “Discerning God’s Call” (visioning), “Hearers and Doers” (cultivating faith practices), “Cultivating Really Great Teams” (leadership practices). Go to www.missionalchurch.org to view the learning modules available now and what is on the way.

Remote coaching with congregation leaders to support implementation

- Coaching supports the implementation and tailoring of resources and processes for each unique local setting.
- A bank of coaching hours can make coaching available for all participating congregations in support of local implementation.
- Coaching is delivered remotely, i.e. through conference calls, email, Skype.
- More tailored support for churches is available at a discount.

A ministry partnership can even give all of this support to some or even all of your churches at a reduced subscription cost.
